Price 10 cents; #8 per 100. The Trade supplied by
H. DEXTER & Co., No. 113 Nassau-st.

"It is by far the ablest book that I have seen upon its subject.
Mr. Spencer ranks among the foremest of the philosophical
thickers of Europe, and brings to the discussion of sducational
questions the largest and latest results of scientific inquiry. His
profe and investigations in the docusin of mind and life, his acute
suralysis of the growth of the intel estual and emotional powers,
his clear perception and luminous statement of first principles,
admirably quality him for the treatment of this great subject
and the performance is worthy of his reputation. It is not only
masterly in exposition, but clothed in a style combining the preclation of science with the first graces of literary composition.
The truth of this little volume should sink deep into the hearts
of parents, teachers, and school directors."

THE TRIBUNE for 1861.

PROSPECTUS.

The XXth Volume of THE WEEKLY TRIBUNE commenced with the issue of September 1. Up to the Presidential Election, now but a few weeks distant, which is to result, we trust, in a Republican triumph through the choice of LINCOLN and HAMLIN, we shall give our nimost energies, and all possible space, to secure that result. Other topics must wait, or be reduced to the narrowest dimensions, until the eventful oth of November. After that time, but more especially after the let of November. After that time, but more especially after the let. next January, we shall be able to forego political discussion almost entirely, for months if not for years, and devote nearly all our columns to subjects of less intense, but more abiding interest.

Among these, we mean to pay especial attention to
I. EDICATION.—The whole subject of Education,
Popular and General, will be discussed in our columns through the year 1861, and we hope to enlist in that discussion out the year 1861, and we hope to enlist in that discussion some of the profoundest thinkers and the ablest instructors in our country. It is at once our loope and our resolve that the cause of Education shall receive an impetus from the exertions of THE TRIBUNE in its behalf during the year 1861.

II. AGRICULTURE.—We have been compelled to restrict our elucidations of this great interest throughout 1800, and shall endeavor to atone therefor in 1961. Whatever discovery, deduction, demonstration, is calculated to render the reward of labor devoted to cultivation more ample or more certain, shall read-

devoted to cultivation more ample or more cert

and advantageously employed in any department of Manafacturand advantageously employed in any acparament of manafactur-ing or Mechanical Industry as a real contribution to the Pub ic Weal, insuring ampler, steader, more convenient, more resonn-erating markets to the Farmer, with fuller employment and bet-ter wages to the Laborer. The Progress of Mining, Iron-making, Steel-making Cloth-wearing, &c., &c., in our country and the world shall be watched and reported by us with an earnest and ictive sympathy.

IV. FOREIGN AFFAIRS.—We employ the be

ents in London, Paris, Turin, Berlin, and other European capi-tals, to transmit us easily and accurate gaviors of the great changes there silently but certainly preparing. In spite of the pressure of Domestic Politics, our News from the Old World is now warded and ample; but we shall have to render it more perfect during

tain Gold Region, and wherever else they seem requisite. From the more accessible portions of our own country, we derive our information mainly from the multifarious correspondents of the Associated Press, from our exchanges, and the occasional letters of intelligent friends. We aim to print the chespest general newspaper, with the follest and most authentic summary of useful intelligence, that is anywhere afforded. Hoping to "make each day a critic on the last," and print a better and better paper from year to year, as our means are steadily enlarged through the senerous coperation of our many well-wishers, we solidit and
